EDUCATION

Northwestern University | Bachelor of Arts in Computer Science and Minor in Economics Expected May. 2023

- GPA: 4.0/4.0
- Relevant Courses: Data Structures & Algorithms, Linear Algebra, and Multivariable Integral Calculus
- Awards: Capital One Software Engineering Summit Participant (1/60 chosen from 500 applicants)

EXPERIENCE

Undergraduate Research Assistant April. 2020 - Present

System Software & Security Lab at Rutgers University | New Brunswick, NJ

- Researched the usage of the Vapnik–Chervonenkis (VC) dimension as a proper metric for testing Neural Networks
- Created, developed, and tested my own experiments and models in PyTorch using the CIFAR10 dataset
- Showed that the VC bound was on average higher than the test accuracy for models like ResNet-18 and Densenet-121
- Effectively presented my findings to Ph.D. students and research professors over a virtual conference

Web Development Intern Jun. 2018 - May. 2019

BlackLapel | New York, NY

- Implemented a universal content management system and an XML sitemap generator to improve company's SEO
- Streamlined unit and integration tests using Selenium WebDriver and Node.js to allow for test automation
- Refactored API endpoints in PHP and wrote Neo4j queries to be compatible with REST API, maintaining legacy code
- Reconfigured the main page to be ADA compliant using Ember.js and developed microservices using Docker containers
- Improved readability of dashboard through UI upgrades and new tools for the team to view sales more effectively

PROJECTS

Biological Network Visualization Sep. 2018 - Jun. 2019

Icahn School of Medicine at Mount Sinai | New York, NY

- Developed tools for my capstone groups' mentors Dr. Selim Kalayci and Dr. Zeynep Gümüş to better analyze biomolecular data
- Utilized the Three.js library to add more 3D features like arrowheads, shapes, and the ability to toggle visibility attribute
- Changed network structure to graph to improve efficiency and runtime when searching for unique node
- Incorporated submodules to allow multiple node hierarchies be parsed, adding more depth to the data
- Gained knowledge in the field of computational biology and how to work with specialized researchers

SeniorMania - <https://seniormaniaman.fun/> Oct. 2018 - Dec. 2018

Bergen County Academies | Hackensack, NJ

- Senior Mania is a list of challenges for each senior class where groups compete with one another to see who can complete the most challenges
- Created a web application to efficiently keep score of each team's points and various challenges they have completed throughout the year
- Gained experience with responsive-design as well as using Firebase as a backend to host user and admin data
- Had 16 teams registered with over 150 students participating, highest number of students in school history

SKILLS

Languages: Java | Python | Javascript | HTML | CSS

Technologies: Git | Firebase | MySQL | Node.JS | jQuery
